Home for the Distressed Quarantine Cabin Passengers.

The Hamburg-American Steamship Wieland Arrives With Sickness.

Yellow Flag Again Hoisted on Board the Steamship *Normandie*. Pictures Show the Plague in Complete Record to Date in New York Waters.

WASHINGTON, Sept. 10.—A dispatch was received at the war department Friday morning from the president directing that a portion of the government reservation at Sandy Hook be turned over to the treasury department as a station for the detention of passengers now on the ships in the lower bay at the New York harbor. The president based his action on representations made to him by Secretary Foster and Secretary Tracy.

The news telegraphed from Sandy Hook and quarantine Friday morning is to the effect that the Hamburg-American line, which had been unable to pass Sandy Hook shortly after 6 o'clock Friday morning, reached the lower bay at 7:15 and then anchored and hoisted the yellow flag, indicating that she has sickness properly abiding on board.

The Wieland is not one of the first class steamers of the Hamburg-American line, but is a vessel of the same size and build as the Bugia, which now is in lower quarantine. The Wieland is said to be like the Bugia, carries both cabin and steerage passengers and no doubt has her usual full complement of the latter.

In addition the yellow flag has also again been hoisted on board the steamship Normandie, where so many saloon passengers have been sick in spite of the fact that the surgeon seems to be attacking the steamship's crew and steerage passengers alone.

It is therefore a relief to know that Sandy Hook also telegraphs that the disease has been checked. On Friday morning a report on board the Bugia or the Moravia, and hopes are entertained that there will be no further outbreaks of the disease on board of these two steamers.

The White Star steamer Britannic, from Liverpool, also passed Sandy Hook Friday morning and as she did so the signal "report me all well" was fluttering from her signal halyards.

Though this news of another cholera port in increases the gravity of the situation, the public is relieved to know that it was the work of some few neighbors who lived in dread of cholera, the establishment being that of which some rags were burned on the Miami canal, a few days ago. The theory is, of course absurd, and the white man.
